

ACTI-MITE

CONTROL OF DERMANYSSUS GALLINAE INFESTATIONS

ZOOTECHNICAL ENVIRONMENTAL BIO CONDITIONER

Contains: pool of selected aerobic microorganisms, nanocomponents.

DESCRIPTION

ACTI-MITE consists of a mix of biological components specifically selected to condition the livestock environment and ensure an improvement in animal health.

The product contains natural antagonistic microorganisms of harmful insects and arthropods (mites and Dermanyssus gallinae) with biocontrol action.

- Dermanyssus Gallinae infestations

USAGE

ACTI-MITE must be diluted in water in a ratio of 1:50 and must be sprayed on: surfaces, equipment and breeding structures in order to ensure uniform and capillary coverage.

The treatment must be repeated after 7-10 days.

Further applications are to be carried out only in case of need.

DOSAGE

2% solutions - use 200 liters of solution for 10,000 hens.

Dosages may vary depending on the health situation of the farm.

The technical service is available to recommend the dosage.

PACKAGE

Available in 10 kg tanks

Store in a cool and dry place, away from heat sources.

To be consumed within 24 months from the production date.
