

## CUTESAN

### SKIN SANITIZER

#### LIQUID SANITIZER

Contains: deionized water – non ionic surfactants – Chlorhexidine Digluconate – Essential Oils.

#### DESCRIPTION

CUTESAN is a modern liquid sanitizer with degreasing action, colorless and free from any type of surfactant. Its use allows to obtain a rapid reduction of the skin bacterial load, eliminating the risk of cross-contamination inside the farms.

- Reduction of epidermis from Staphylococcus
- Healing of wounds
- Action on organic matter
- Reduces bites

#### ACTION

The special formulation based on active ingredients with high disinfectant and degreasing power, is able to exert its action without interference for any organic dirt present.

The use of CUTESAN ensures the sanitization of the skin of piglets even in case of bite wounds.

#### DOSAGE

Use CUTESAN in 50% dilution with water, then proceed to wash the piglets by spraying with the prepared solution.

Repeat for two or three days.

Treatment should be carried out periodically as needed.

In case of serious contamination it is advisable to use the product as it is in the manner described above.

Dosages may vary depending on the health situation of the farm.

The technical service is available to advise the dosage.
