

LIQUI-CALCIOVIT

CALCIUM GLUCONATE - VIT.D3 - CHOLINE - TRACE ELEMENTS

LIQUID FOR ALL SPECIES

Contains: Calcium Chloride, Magnesium Chloride, Calcium Gluconate, Sucrose,
ADDITIVES per kg:

3a671 Vitamin D3, 3a890 Choline Chloride, Compounds of Trace Elements: 3b608 Zinc (Zinc chelate of Glycine Hydrates) 3b506 Manganese (Manganese chelate of Glycine Hydrates)

DESCRIPTION

LIQUI-CALCIOVIT is a complementary feed in liquid form composed of calcium gluconate, calcium chloride, magnesium chloride, choline chloride, supplemented with vitamin D3 and trace elements. The use of the product allows to obtain the effect of:

- Correct calcium deficiency states
- Resolve cases of bone demineralization
- Improve skeletal formation in fast growing animals
- Improve the quality of eggs in general (shell, yolk, egg white)

ACTION

The intestinal absorption of calcium varies greatly from animal to animal and also depends on the form in which it is administered. LIQUI-CALCIOVIT contains calcium sources in organic and mineral form to significantly increase intestinal absorption and fastening speed.

LIQUI-CALCIOVIT is able to intervene quickly with the contribution of bioavailable calcium capable of fixing itself where other forms of the mineral have failed. The trace elements help to improve the thickness of the egg and the correct metabolism of the animal. Choline chloride acts as a hepatoprotector.

DOSAGE

Administer at a dose of g.100/200 for 3-5 days
Dosages may vary depending on the health situation of the farm.
The technical service is available to advise the dosage.

PACKAGES

Available in tanks of 25 kg
Store in a cool, dry place, away from heat sources.
To be consumed within 12 months from the date of production.
FAMI-QS Certificate

S.t. rev.22
