

## PHYTO-HYSTO

### CONTROL OF THE HISTOMONIASIS OF BIRDS

#### LIQUID FOR BIRDS

Contains: Sodium chloride, plant extracts of Echinacea a., Cardus m., Anhydrous glucose.

#### DESCRIPTION

The properties of the phytoderivative active ingredients contained in PHYTO-HYSTO are reported below, as per the relevant scientific literature.

ECHINACEA extract plays elective action on the development of nonspecific immunity and resistance of animals to pathogens.

CARDUS extract has an elective effect on the regeneration of the hepatic pachyderm.

- Increases the immunity of animals
- Adjuvant in the prophylaxis of Histomonas (H.) meleagridis
- Regenerating action of tissues

#### ACTION

PHYTO-HYSTO is indicated in diseases of parasitic histomoniasis disease.

Although histomoniasis mainly affects turkeys with lesions to the blind and liver, it can also be found in chickens, in which it can cause considerable damage (with lesions that are often present only in the blind). The causative agent is a flagellated protozoan, Histomonas (H.) meleagridis, which can infest different bird species in addition to chickens and turkeys: pheasants, partridges, quails and guinea fowls.

#### DOSAGE

Administer 100/150g. for 100L of drinking water for 10/15 consecutive days.

Repeat every 15 days.

Dosages may vary depending on the health situation of the farm.  
The technical service is available to advise the dosage.

#### PACKAGES

Available in kg.10 tanks

Store in a cool, dry place, away from heat sources.

To be consumed within 24 months from the date of production.
