LIQUID FOR ALL SPECIES

Contains: Propylene glycol, tri- and di-glycerides of butyric acid, glycerin.

ADDITIVES (per Kg)

Preservatives: E236 Formic acid, E260 Acetic acid, E330 Citric acid, E280 Propionic acid. Organoleptic additives: 120,000mg blend of flavoring substances.

DESCRIPTION

Zooil Poultry is a functional food consisting of a mixture of short and medium chain fatty acids (C4-C12) synergistically combined with essential oils designed for their beneficial action on the intestine.

- Reduction of the drug and reduction of antibiotic resistance
- Better intestinal morphology
- Significant increase in the height of the villi
- Increase in goblet cells

ACTION

Zooil Poultry contributes to the prevention of intestinal diseases, with economic and health advantages compared to traditional therapies. It strengthens the natural defense system of the intestinal mucous membranes, promotes a better state of health of the animals favoring their zootechnical performances.

DOSAGE

To be administered in drinking water at the rate of:
Poultry 0.04%-0.10% (i.e. 400-1000g per 1,000kg of feed).
Or 0.20-0.50g of 100L if liquid feed.

Dosages may vary depending on the health situation of the farm.
The technical service is available to advise the dosage

PACKAGES

Available in tanks of kg.10
Store in a cool, dry place, away from heat sources.
Store within 24 months from the date of manufacture.
Certificate FAMI-QS
