DESCRIPTION

Zooil Respiratory is a synergistic combination of essential oils, products derived from the processing of particular plant species, acidifiers and vitamins specially designed and chosen for their beneficial action on the respiratory system of the animal

Zooil Respiratory comes in the form of a liquid emulsion and should be administered in drinking water.

- Reduction of the drug and reduction of antibiotic resistance
- Decreases basal metabolic rate
- Strengthens the body's immune system
- Reduces stress

ACTION

Zooil Respiratory contributes to the prevention of diseases localized in the respiratory environment, with consequent economic advantages compared to traditional therapies.
