

LENTYPOU+

FOR THE CONTROL OF DERMANYSSUS G.

COMPLEMENTARY FEED FOR POULTRY

Composition:

water, sodium chloride, magnesium chloride and caramelized sugar

organic. Additives :

Aromatic substances: plant extracts Thymus vulgaris (organic), Tanacetum vulgare (2 mL/L), ethanol 2b02078 (13.7%)

Analytical constituents:

Moisture: 87.3%, Crude Protein: < 0.3%, Crude Fiber: < 0.4%, Crude Fat: < 0.6%, Ash crude: 0.80%, lysine: < 0.02%, methionine: < 0.02%, calcium: 6.70mg/L, sodium: 3.33g/L, Phosphorus: < 0.10%.

DESCRIPTION

Adjuvant in the prevention of ectoparasite infestations in poultry farming.

The synergistic association of plant extracts prevents the reproduction and life of arthropods such as ectoparasites and obligate hematophagous that normally parasitize in laying hen farms.

The targets (mites), once the blood meal is completed, are disoriented, the presence of plant extracts prevents the metabolization and digestion of the meal.

Social and reproductive behavior is disrupted.

The mites remain visible but no longer organized and will progressively form larger and larger clusters.

The color of the mites will turn from red to black and finally gray with a powdery consistency.

DOSAGE

Liquid product to be mixed with drinking water

0.75 litres / 1 000 litres for 7 consecutive days.

Renew as needed.

Prior to the use of LENTYPOU+, it is recommended that a liver tonic (HEPAT'OR) be administered to optimize product absorption.

Dosages may vary depending on the health situation of the farm.

The technical service is available to advise on the dosage.

PACKAGING

Available in 5 kg tanks (boxes of 4 pcs)

Store in a cool, dry place, away from heat sources.

Consume within 24 months from the date of manufacture.

FAMI-QS Certificate
